A.C Ch Shatrugo's Honky Tonk Angel CD BROM

"Misty" was a fawn bitch, measuring 26 inches at the withers. She was born March 22, 1986 in Canada. Since Misty was out of a long line of dual titlists, I was forced to immerse myself into obedience. I achieved a CD on her and also won "High Scoring Champion" at the 1988 National Specialty in Pennsylvania. She was shown by her breeder to her Canadian Championship and all her American titles were by us. Her second litter was a line breeding that produced true. We got large sweet-natured dogs that had exceptional movement. From this litter she produced a daughter who went High In Trial at the 1991 National Specialty, as well as the WD, WB and RWB at the 1990 Southwest Regional Specialty. The most important factors that she threw in her offspring were her temperament and movement. The obvious faults were plain head pieces and toenails as tough as steel. She also carried the gene for Dudley's. We put her out for potty one morning and 15 minutes later found her in shock from a closed pyometria. She lived but was spayed. At five years of age, still thinking she was a youngster, she ruptured her cruciate which prevented any further work in obedience. Misty was gently put to sleep on June 11, 1992 due to a benign space occupying Aortic Cell tumor. Your foundation bitch is supposed to be the best you can get, She was.

By Lynn and Bob Spohr of Bastion Bullmastiffs, owners
bred by Pam & Tom McClintock, Shatrugo Bullmastiffs
